

## Using the Bizzabo Twitter Page

In today's modern age, you're not anyone unless you have some sort of a social media handle. Keep your attendees up to date with the latest tweets that you are sending out about your event, and see what others are tweeting with your hashtag.

### How do I set up my Twitter feed on my website?

Head to the **Basics** tab, and scroll to the bottom of the General Info section. There are 2 Twitter fields; Twitter Name and Twitter Hashtag.

Now, when you tweet, all tweets from your designated Twitter account will get pulled to the Tweets page on your website.

When using the Bizzabo app, your attendees can also see tweets from any Twitter user that use the hashtag that you have set for your event.

Note: Tweets from other Twitter users with your hashtag will only get pulled to the Bizzabo app, and not to your website

Keep your attendees in the loop with the latest news, by maintaining easy access to your event's Twitter feed
